[SCHF tce nmp dcm proposals 10 2017.pdf](#)

Hi Joel,

Attached are comments from Safer Chemicals Healthy Families, NRDC, Earthjustice and the Environmental Health Strategy Center following up on the issues raised at EPA's September 12, 2017 workshop on the use of methylene chloride (MC) in furniture refinishing. (Docket ID EPA-HQ-OPPT-2017-0139) Also attached are two letters that we reference in our comments.

Please note that we are e-mailing because we had thought that, because November 12 was a Sunday, the docket would remain open until today. We regret the error and hope that you will include our comments in the record.

Please let me know if there are any questions. Thanks.

Liz Hitchcock, Government Affairs Director
